

Peony Immune White Peony Root Extract

A Balanced Approach to Immune System Health

#01811 • 60 vegetarian capsules

Healthy aging requires a dynamic immune system.

A youthful body is dependent on balanced immune-cell activity to maintain effective, responsive, and *modulated* immunity.¹

Extracts from the **white peony root** have been used in China for immune balance for more than 1,200 years.² Modern science now recognizes the immune importance of a bioactive peony extract component called *paeoniflorin*.³⁻⁵

Peony Immune White Peony Root Extract is a standardized extract of active *white peony* compounds that have been shown to help maintain the balanced responsiveness, sensitivity, and strength of a *properly-modulated* immune response.⁶⁻¹⁰

Through a host of subtle mechanisms, **Peony Immune White Peony Root Extract** promotes *immune homeostasis* — optimal immune health — by limiting production of inflammatory molecules and naturally balancing inflammation-suppressing cells and pro-inflammatory cells.³⁻⁵

A host of human clinical trials have demonstrated that the compounds in **Peony Immune White Peony Root Extract** promote a healthy and balanced inflammatory response.⁶⁻¹⁰

When it comes to immune health, it's wise to be proactive. Give your body the support it needs with Peony Immune.
